## **AMENDMENT**

This Amendment is submitted in response to a non-final first office action in the above case dated October 5, 2007 ("Office Action") in which the Examiner rejected all the claims under the judicially created doctrine of non-statutory double patenting and as obvious (35 U.S.C. §103) over cited art. Applicants submit herewith a terminal disclaimer to overcome the non-statutory double patenting rejections. Applicants have amended certain claims to correct minor errors and clarify the claim language. Applicants traverse the prior art rejections and submit that all pending claims 1-37 are patentable over the cited art and in condition for allowance for the reasons discussed herein.

Amendments to the Claims are reflected in the listing of claims which begins on page 2. Remarks/Arguments begin on page 10.
